

➤ OSPT Alliance and HCE

A collaborative approach to innovation

National and Regional fare collection specifications

- Token service providers
- TEE & white-box crypto ecosystem
- Systems integrators
- Mobile app & API developers
- Account service providers
- SE, SAM and reader manufacturers

HCE & Ticketing have the potential to drive the use of mobile

Value added services:

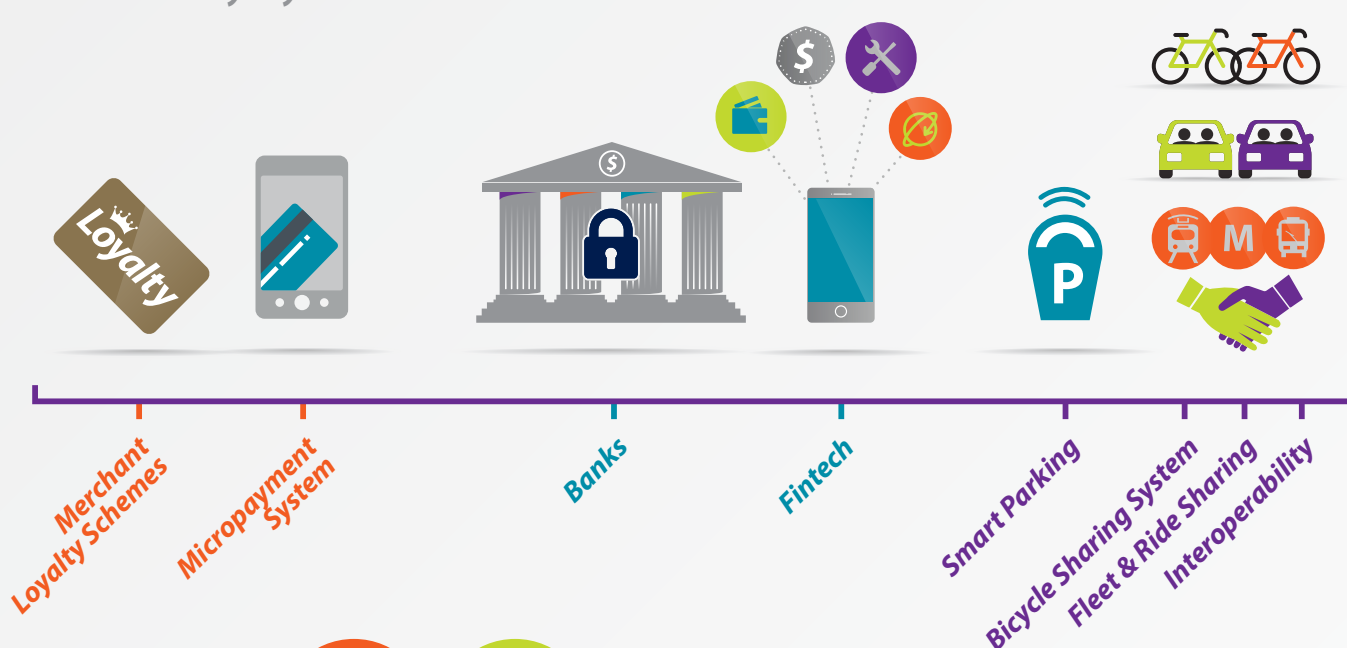

Enabling seamless mobile driven consumption experiences, such as micropayment and merchant loyalty schemes

Banks, fintechs:

Bank and fintech provision of account based ticketing credentials

Mobility as a Service:

Bringing interoperability to connect adjacent systems

Open standards will bring major benefits to HCE in transport, just as they do in payments

But creating open standards can seem complex without a collaborative, bottom up approach between industry participants and national and regional specification bodies

OSPT Alliance's broad collaborative approach to innovation makes this possible
