Why OSPT Alliance?

ospt™

To truly realize the success of Mobility as a Service (MaaS), **standardization will be essential.**

❯ OSPT Alliance is on a mission to bring together all stakeholders to realize a more secure, seamless and harmonized transport and mobility ecosystem.

❯ It develops and owns the CIPURSE™ Specification, a non-proprietary open standard for secure transactions.

❯ Over 110+ member companies.

❯ Comprised of stakeholders including:

PTAs and PTOs, system integrators, hardware manufacturers, software developers, consultants, smartcard vendors, industry and not-for-profit associations, testing experts and TSPs

The open standard for transport ticketing

CIPURSE is already widely considered 'the' open standard for transport ticketing…

But it's now adding value across the world to a number of different applications.

ID

Loyalty

With deployments live across the world, from Brazil to Korea…

→

CIPURSE is…

- Developed on industry-proven security standards
- Cost-effective
- Form factor & hardware agnostic
- Simple to scale
- Mature, industry-recognized
- Free from vendor lock-in

- Quick – with transaction times below industry standards
- Tailorable to local needs
- Supportive of multi-application solutions
- Futureproof – supporting ABT, stored value and mobile use cases
